

Chemed Reports First-Quarter Results

April 18, 2002

CINCINNATI, April 18, 2002--Chemed Corporation (NYSE:CHE) (OTCBB:CHEQP) today reported net income of \$.47 per share for the first quarter, ended March 31, 2002, as compared with \$.46 per share in 2001's first quarter. Net income included capital gains of \$.07 per share in both years. For 2001, net income also included \$.12 per share from the amortization of goodwill and a loss of \$.01 per share from discontinued operations. On an adjusted basis, before capital gains and amortization of goodwill, income from continuing operations amounted to \$.40 in the 2002 first quarter versus \$.52 in the same 2001 quarter.

Service revenues and sales from continuing operations for the 2002 first quarter were \$117.0 million versus \$121.2 million in 2001. Earnings before capital gains, interest, taxes, depreciation, and amortization (EBITDA) for the 2002 first quarter totaled \$11.1 million versus EBITDA of \$13.7 million for the 2001 quarter, and for 2002, EBITDA represented 9% of revenues.

Commenting on the first quarter's results, Chemed President and Chief Executive Officer Kevin J. McNamara said, "Chemed's overall performance reflects the benefits of reduced expenses at Chemed headquarters, offset by the effects of margin erosion at our flagship Roto-Rooter subsidiary."

Mr. McNamara continued, "Roto-Rooter recorded revenues of \$65.3 million for the 2002 first quarter, 4.6% below the prior-year first quarter. Excluding acquisitions and divestitures in both periods, Roto-Rooter's revenues on a comparable basis would have been 3.4% below revenues in the prior year.

"Roto-Rooter company operations and franchisees continue to feel the impact of economy-related issues. Soft demand, coupled with significantly higher casualty and health insurance costs and higher labor costs, has put pressure on the gross margin, which declined 2.9 percentage points in company operations in the first quarter. As a result, earnings at Roto-Rooter amounted to \$3.5 million for the 2002 first quarter versus \$4.9 million before goodwill amortization a year ago.

"Many of these cost increases are necessary in order to maintain competitive advantage, particularly in the areas of advertising and marketing and service force recruiting and training. Management is working diligently to rein in insurance costs and adjust work schedules to reduce labor costs."

Discussing Chemed's other operations, Mr. McNamara said, "Service America continues to make progress on its centralization projects, which are near completion, and expects to realize service improvements and cost efficiencies as a result. Even so, for the quarter just ended, Service America recorded profits 51% below the prior-year first quarter excluding goodwill amortization, while revenues of \$15.6 million were off 13%. Patient Care, Chemed's home-healthcare services business, however, turned in excellent first-quarter results with a 14% increase in earnings on revenue growth of 3.6% to \$36.2 million."

Concluding, Mr. McNamara said, "Management is working to restore historical margins within Roto-Rooter. Service America will benefit from lower costs as the year progresses, and Patient Care is performing as expected. Investments in training and selling efforts at Roto-Rooter have historically increased revenues, and as the economy picks up momentum, we expect Roto-Rooter's revenue growth and profit performance will improve."

In February, the Chemed Board of Directors declared a quarterly dividend of \$.11 per share, which was paid in March. This dividend represented the 123rd consecutive quarterly dividend paid to Chemed shareholders.

Chemed Corporation (www.chemed.com), headquartered in Cincinnati, is a New York Stock Exchange-listed corporation with strategic positions in plumbing and drain cleaning; residential appliance and air-conditioning repair; and home healthcare services.
